

INTRODUCING NEW 2.5MM SEALED SIGNAL DOUBLE LOCK CONNECTORS

- Offers IP67 rated dust and water protection
- Saves space with a compact 2.5mm centerline spacing
- Provides for ease of assembly with a snag-proof latch

TE Connectivity (TE) introduces its new 2.5mm Sealed Signal Double Lock connectors. These connectors offer best in class IP67 grade waterproofing and dust protection for applications used in water related or high humidity environments. The 2.5mm centerline offers an ideal miniaturized solution for today's smaller designs. A snag-proof latch provides for ease of assembly and polarized lance-less terminals with an optional TPA (terminal position assurance) improve productivity by helping to ensure proper assembly.

KEY BENEFITS

- Provides IP67 rated dust and water protection for water related or high humidity environments.
- Offers up to a 3A max. current and 250V rating
- Saves space with a miniaturized 2.5mm centerline
- Provides for ease of assembly with a snag-proof latch

TARGET MARKETS

- Major home appliances
- Small home appliances
- Lighting
- Outdoor tools
- Industrial
- Automotive
- Personal health care

TARGET APPLICATIONS

- Water heaters, refrigeration, laundry (washing machines and dryers), cooking (range hoods)
- Rice cookers, water purifiers, humidifiers
- Outdoor and commercial lighting
- Lawn mowers and sprinkler system interfaces
- Industrial refrigeration
- Automotive battery chargers
- Power cords
- Smart toilet seat
