

The IoT is About Connection

TE Connectivity (TE) has the products and people to connect it.

The Internet of Things (IoT) has quickly become the INTERNET OF EVERY THING. It is helping to create smart environments by linking end devices and access point to everyday settings and tasks that help individuals, businesses and potentially whole societies, live in a smarter and more comfortable way.

TE's expanded line of antennas and connectors are enabling new possibilities, driving us towards a more connected future for everything.

TE Connectivity Solutions

 Data and Power Connectors • Broad product portfolio including wire-to-board , USB connectors, battery connectors, FPC, spring finger etc. • Support the market trends of high-speed, energy-efficiency, and miniaturization • System design flexibility • Quick time-to-market	 Embedded Antennas • Approved on all major cellular carriers • Designed, produced, sold and shipped over 1B+ antennas globally • Standard high-performance antennas can address most wireless protocols Offers custom designed antennas that provide market leading RF performance	 External Antennas • The newly acquired Laird Connectivity's External Antennas business brings with it a long history of associated quality and customer service with their external antenna product portfolio New product line acquired from Laird Connectivity's External Antennas business	 Sensors • Our technologies enable measurement capabilities such as pressure, temperature, position, vibration, photonics, force, and humidity • Used for a variety of IoT applications

Expertise and Value-Added Services

EXTENSIVE PRODUCT BREADTH  TE now has the antenna and connector products engineers need, backed by a global manufacturing presence and distribution network.	REDUCING CONNECTIVITY BARRIERS  Enabling wireless connectivity anywhere is more attainable with TE's global resource of local industry experts and cost-effective manufacturing capabilities.	END-TO-END PARTNERSHIPS  From development to testing to production, TE's engineers are available to support and co-create during every step of the design process, reduce risk, and help make IoT applications a reality.
