

Hybrid & Electric Vehicle (HEV)

◆ Value To Customer

- Complete range of HEV systems and components
- Technologies specific for battery-powered transportation
- New series of connection systems that incorporate shielding, sealing, and high-voltage safety interconnects

◆ Delphi Advantage

- Extensive HEV systems knowledge
- Innovative component design and integration skills
- Robust portfolio of hybrid and electric vehicle components and systems.

◆ Functionality

Hybrid and electric vehicle components and systems to support:

- Charging Systems
- Connection Systems
- Electrical Centers
- Energy Storage Systems
- Power Electronics
