ARATAS | An independent company previously affiliated with OMRON

Miscellaneous – Photomicrosensors
EE SX1103, EE SX1105 and EE SX1106 Discontinuation

In an effort to streamline our product offering, Aratas will discontinue select models of Non-Amplified Photomicrosensors; effective February 29, 2028. The suggested replacements will have differences with electrical characteristics and various dimensions including; Case dimensions, Slot Width and Depth, Aperture Size, and PCB layout. As such, redesign of existing applications and circuits likely will be required and is recommended. Also, for new circuit designs, please consider Aratas' suggested Surface Mount alternatives. The following notice will list the models affected by the partial discontinuation; should you have any questions, however, please communicate with your local
Aratas representative.

NOTE 1: Only the listed models of Non-Amplified Photomicrosensors are being discontinued.
NOTE 2: Please use careful consideration when evaluating the suggested replacements.

Last Order Date (Last Time Buy Date):

End of February 2028 (February 29, 2028)

List of Discontinued Models:

Discontinued Models	**Suggested Replacements** (For new designs)	**Suggested Replacements – Alternate** (For new designs)
EE-SX1103	EE-SX1018	EE-SX1320
EE-SX1105		
EE-SX1106	EE-SX1055	EE-SX1330

Suggested Replacements

Discontinued Models	**Suggested Replacements**	Body Color	Dimensions	Wire connection	Mounting Dimensions	Charac-teristics	Operation ratings	Operation methods
EE-SX1103	EE-SX1018	**	*	**	*	*	-	-
EE-SX1105								
EE-SX1106	EE-SX1055	**	*	**	*	*	-	-

Suggested Replacements – Alternate (Surface Mount)

Discontinued Models	**Suggested Replacements**	Body Color	Dimensions	Wire connection	Mounting Dimensions	Charac-teristics	Operation ratings	Operation methods
