Description of Change: The lead-bearing (SnPb) solder version of the NOMC series is no longer available. Current backlog and future orders will only be completed as lead-bearing if there exists current WIP or FG to supply. Otherwise backlog will need to be switched to the lead-free (100% matte tin) soldered version NOMCT.

Reason for Change: Mold house no longer supports SnPb solder in their process.

Expected Influence on Quality/Reliability/Performance: Please consider lead-free soldered (100% matte tin) version NOMCT. 100% matte tin typically is backwards compatible in most applications. Recommended solder reflow temperature is slightly higher for 100% matte tin (250 °C) than SnPb soldered parts (235 °C). For more details on solder profiles please see: <https://www.vishay.com/docs/31052/smsolderingdale.pdf>

Part Numbers/Series/Families Affected: NOMC1*

Vishay Brand(S): Vishay Dale Thin Film,Vishay Thin Film

Time Schedule:

Last Time Buy Date: Tuesday July 21, 2026

Last Time Ship Date: Thursday December 31, 2026

Sample Availability: Last time buy dependent upon availability of current WIP and FG that may already be manufactured.

Product Identification: Lead-bearing (SnPB) parts start NOMC1. The lead-free (100% matte tin) version starts NOMCT1. This PTN does not affect the NOMCA (automotive series) at all. To determine the lead-free equivalent add the letter "T" after the NOMC in the lead-bearing PN.

Qualification Data: N/A

This PTN is considered approved, without further notification, unless we receive specific customer concerns before Monday July 27, 2026 or as specified by contract.
