TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

Product Description: (Text limited to 120 characters)

SMC angle male

General Description of Changes

As TE continuously strives for improvements, this product change notification (PCN) serves to inform you of a localization decision: based on a thorough analysis of the demand picture, TE expands its manufacturing location of SMC angled male to TE Suzhou plant. To realize this, toolings are transferred to and/or added in Suzhou plant. TE reserves the right, to ship parts from both production locations globally when needed. There will be no expected impact on the form, fit, or function of the affected products at this time. The transfer will be conducted in accordance with a strict internal procedure designed to ensure that product quality, supply capability, and form-fit-function remain unaffected. The additional manufacturing site operates under a certified quality management system as well, compliant with recognized industry standards. An internal qualification and release process, based on our specifications, will be completed prior to the shipment of any products from the additional location to ensure performance and compliance. A TE-internal release test based on the relevant part specifications will be executed before delivery. If you require a PPAP, a request via ePPAP (via www.te.com or request to TE Sales representative) needs to be initiated by customers. PPAP/PSW will be prepared based on agreement between the corresponding parties. In case no request is obtained until mentioned date, PPAP/PSW will be considered as approved, and the change is considered as fully released.
